**Views:**

- The elevated inflation justified the two recent interest rate hikes by the central bank.
- The excise duty cuts on petrol & diesel and duty cuts on other items may have played a part in cooling down inflation. Besides the base effect, the impact of lowering of taxes by the Centre earlier did play out to a certain extent to lower inflation.
- Following are the latest inflation projections given by RBI in its Monetary Policy:

RBI Projection	Q1 FY23	Q2 FY23	Q3 FY23	Q4 FY23	FY23
CPI Inflation	7.5%	7.4%	6.2%	5.8%	6.7%

- Going forward, favorable base effect will start diminishing from June 2022 onwards but there may be relief on inflation front on account of duty cuts on imports, debarring wheat exports and expectations of normal monsoon in the coming months.
