Views:

- ☛ IIP has been seeing topsy turvy growth since last 5 months, after hitting as high as 19.5% in May'22.
- ☛ Manufacturing Sector which has the highest weightage in the Index of Industrial Production, has been confronting high input cost and feeble demand scenario externally.
- ☛ However, the near-term growth outlook for the Indian economy is likely to be driven domestically as reflected in high frequency indicators, we may see some uptick in IIP numbers.
